ANNOUNCEMENTS & ENHANCEMENTS

ANNOUNCEMENTS

Amendments to eligibility requirements for qualified investors and market value requirements for publicly held shares on the Nomu- Parallel Market

The proposed draft amendments aim to develop the categories of qualified investors in the Parallel Market by adding a new classified category among qualified investors and updating the standards and requirements that an investor must meet to be eligible to trade and invest in the Parallel Market, which will support the growth of the Parallel Market investors base. The amendments also include changes to the market value requirement for publicly held shares and the expected aggregate market value requirement as of the listing date for all shares to be listed on the Parallel Market.
