

## **SMC HEALTHCARE OPENS NEW OUTPATIENT CLINIC CENTER IN NORTH RIYADH**

**Riyadh, Saudi Arabia – 19 January 2026:** Specialized Medical Company (SMC Healthcare), one of the Kingdom's leading private healthcare providers, today announced the official opening of its new outpatient clinic center, SMC Clinics, on Prince Mohammad Bin Saad Bin Abdulaziz Road in Al Malqa District in North Riyadh, marking a significant milestone in the Group's ongoing expansion strategy.

**Bassam Chahine, CEO of SMC Healthcare, stated:** *"The official opening of our outpatient clinic center in Al Malqa represents an important step in strengthening SMC Healthcare's presence in North Riyadh. This facility reflects our strategic focus on expanding outpatient services and providing accessible, integrated, and high-quality care in key growth districts. We are proud to offer a modern healthcare environment supported by advanced medical capabilities, reinforcing our commitment to meeting the evolving needs of our communities."*

The SMC Healthcare clinic center has been designed to deliver comprehensive, high-quality, and patient-centered care through 35 clinics across a wide range of medical specialties including dentistry, endocrinology, pediatrics, orthopedics, ENT, general surgery, ophthalmology, obstetrics and gynecology, dermatology, and physiotherapy, among others.

The facility includes an integrated urgent care center with emergency services operating 24 hours a day, seven days a week, supported by dedicated emergency medicine specialists, fully equipped treatment beds, and advanced medical equipment. Radiology services at the center are supported by modern imaging technologies and diagnostic equipment, adhering to the highest clinical and operational standards.

The center also features a fully integrated outpatient pharmacy providing medications and essential medical supplies, as well as an on-site laboratory equipped with advanced diagnostic technologies. In addition, it offers both

outdoor and underground covered parking, accommodating approximately 100 vehicles.

The facility has been developed with a modern architectural design and high-quality engineering finishes to create a comfortable and welcoming environment for patients and visitors.
