1. Standard Deviation is a measure of risk. It is calculated as any volatility in returns over a period of time. The lower the volatility, the more homogeneous the set of returns.

2. Sharpe Ratio is a risk-adjusted performance measure. It is calculated as the difference of the Fund Manager excess return over the risk-free rate, divided by the Standard Deviation. The greater a portfolio's Sharpe Ratio, the better its risk-adjusted performance.

3. Tracking Error is a measure of risks. It is calculated as the Standard Deviation between the Fund Manager's return and the Benchmark's return. The lower the Tracking Error, the lower the Fund Manager deviates from the Benchmark.

4. Beta is a measure of the average historical sensitivity of the Fund's returns compared to market returns. It is calculated by using the covariance of the Fund and the market on the variance of the market.

5. Alpha measures any excess return achieved by the Fund compared to the performance of the index.

6. Information Ratio is a risk-adjusted performance measure. It is calculated as the active return of the Fund Manager, divided by its tracking error. The higher the Information ratio, the higher the Fund Manager ability to generate excess returns per Unit of excess risk.

The performance and risk parameters were calculated based on the Unit's net value.

OVERVIEW OF GLOBAL MARKETS

Global equity markets were volatile in Q4 2023 driven by fears of an economic slowdown, causing downward pressures on markets in October and November. However, this was followed by a rise in December driven by positive business income reports and the Fed's decision to temporarily pause interest rate hikes. This calmed any fears of a recession and resulted overall in modest gains in key market indicators. Alkhabeer Global Equity Index rose by 7.7% in Q4 2023 and by 20.6% for the year 2023.

IMF forecasts favorable growth of global GDP (2.9%), developed markets (1.4%) and emerging markets (4.0%). However, the pace is expected to be slower compared to long term historic averages. The main driver in 2024 is the expected decrease of the interest and inflation rates and the growth of GDP.
