

FUND OVERVIEW

Alkhabeer Growth and Income Traded Fund (“the Fund”) is a closed-ended Shari’a-compliant investment traded public equity fund established in accordance with the applicable laws and regulations of the Kingdom of Saudi Arabia and regulated by the Capital Market Authority (CMA). The Fund’s investment objective is to increase the Fund’s Net Asset Value by boosting the performance of the Fund’s investments in the long term and generating current income to investors from the dividend distributions of the companies in which the Fund invests, in addition to part of the capital appreciation resulting from the growth of market value of the securities invested in. This is achieved by investing in a diversified portfolio of global equities, public and private equities, initial public offerings of companies, private placements, cash, and cash equivalents.

DESCRIPTION OF THE FUND'S BENCHMARK

Alkhabeer Global Equity Index is an index especially created for the Fund in collaboration with the Index Service Provider, who will calculate the valuations of the companies that are included in the Index and will manage the Index on behalf of the Fund. The Index includes companies which are diversified by sector and size in the largest global capital markets, as well as the largest leading companies in the Kingdom of Saudi Arabia. The companies will be filtered based on a market value exceeding US \$ 100 million, and a trade value exceeding US \$ 1 million per day. The Index includes 160 global companies representing the largest global capital markets, in addition to the largest 10 listed companies on the Saudi Stock Exchange, compliant with the guidelines of the Shari'a Supervisory Committee. The global companies included in the index are divided by market cap into three categories: the largest 70 in terms of market value of free float shares among large market cap companies, the largest 50 companies in terms of market value of free float shares among medium market cap companies, and the largest 40 companies in terms of market value of free float shares among small market cap companies.

Large market cap companies are defined as companies representing the largest market capitalization. It is the segment which represents up to 70% of the aggregate capitalization of the market combined, while the medium cap segment represents more than 70% up to 85% of the aggregate market capitalization, and the small cap represents more than 85% up to 100% of the aggregate market capitalization.

1. Standard Deviation is a measure of risk. It is calculated as any volatility in returns over a period of time. The lower the volatility, the more homogeneous the set of returns.

2. Sharpe Ratio is a risk-adjusted performance measure. It is calculated as the difference of the Fund Manager excess return over the risk-free rate, divided by the Standard Deviation. The greater a portfolio's Sharpe Ratio, the better its risk-adjusted performance.

3. Tracking Error is a measure of risks. It is calculated as the Standard Deviation between the Fund Manager's return and the Benchmark's return. The lower the Tracking Error, the lower the Fund Manager deviates from the Benchmark.

4. Beta is a measure of the average historical sensitivity of the Fund's returns compared to market returns. It is calculated by using the covariance of the Fund and the market on the variance of the market.

5. Alpha measures any excess return achieved by the Fund compared to the performance of the index.

6. Information Ratio is a risk-adjusted performance measure. It is calculated as the active return of the Fund Manager, divided by its tracking error. The higher the Information ratio, the higher the Fund Manager ability to generate excess returns per Unit of excess risk.

The performance and risk parameters were calculated based on the Unit's net value.

FUND HIGHLIGHTS AND ANY FUNDAMENTAL OR NON-FUNDAMENTAL CHANGES AFFECTING THE PERFORMANCE OF THE FUND

In the general assembly meeting held on July 19, 2023, the unitholders approved the Buyback for Cancellation of Units of up to 50% of the total existing units.

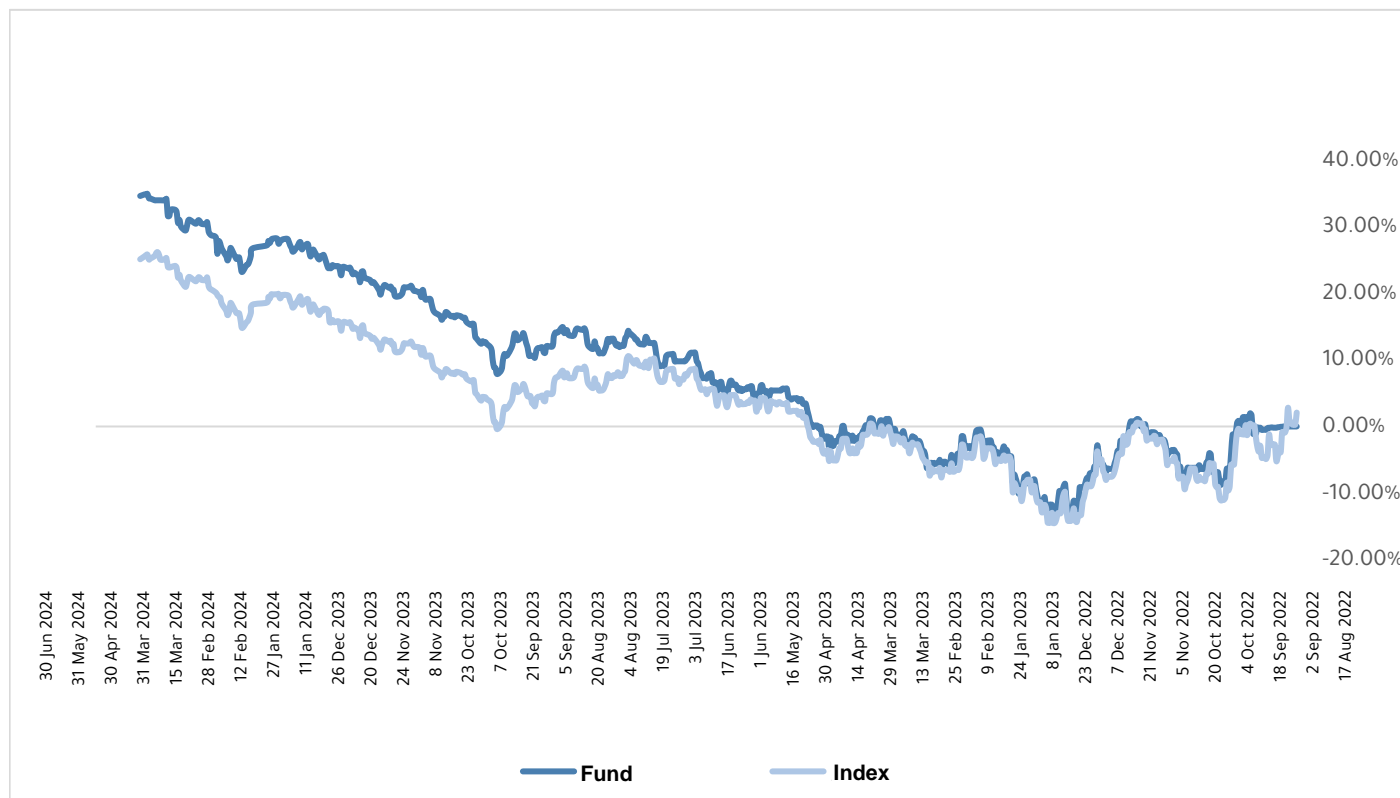

As of June 30, 2024, the Fund Manager has successfully bought back 29,475,700 units of the Fund amounting to 29.48% of the total number of units.

OVERVIEW OF GLOBAL MARKETS

In Q2 2024, global equity markets grew moderately amid improving economic conditions and abating inflationary pressures. The US Fed's cautious monetary policy approach, combined with favorable corporate income reports, contributed to easing fears of an imminent recession. As a result, main indices recorded gains, with Alkhabeer Global Equities Index rising by 4.40% in the second quarter of 2024 and 11.24% year-to-date.

The latest IMF World Economic Outlook for April 2024 forecasts higher global GDP growth in 2024 to 3.2% driven by a greater than expected resilience of the US economy and many of the larger emerging market economies, as well as China's continued fiscal support. It is projected that advanced economies will grow by 1.7%, while emerging markets are expected to grow by 4.2% in 2024.
