- D) **Investment Fund Term and Fund Maturity Date:** Yaqeen Petrochemical ETF is an open-end public Investment Fund, and there will be no specific period for the fund's operation and no date for the fund's maturity.

2. Applicable Law

Yaqeen Petrochemical ETF and the Fund Manager shall be subject to the Capital Market Law and its executive regulations and other applicable laws and regulations applicable in the Kingdom of Saudi Arabia.

3. Investment Policies and Practice

- A) **Investment objectives of the Investment Fund:** The Fund seeks to achieve growth and long-term capital gains through the passive management of a Market Basket of petrochemical sector companies listed in the Saudi market in order to achieve a performance level similar to the performance of the index before fees and expenses.
- B) **Type (s) of securities in which the Fund will invest mainly** - The Fund is authorized only to invest in the petrochemicals sector compliant with Shariah controls, listed and traded in the Saudi Stock Exchange (Tadawul) within the index's portfolio. The fund may invest its available cash in short-term money market instruments such as murabaha deals at the discretion of the fund manager and within the framework of the fund's investment objectives.
- C) **Any investment concentration policy:** The Fund invests at least 95% of its assets in the petrochemical sector companies compliant with Shariah regulations listed and traded in the Tadawul market in the Kingdom of Saudi Arabia. The Fund invests in the components of the Fund's portfolio, taking into account the relative weight of the asset allocation, while adequate cash is maintained in the Fund on an ongoing basis to meet expenses and any other obligations to the Fund.
- D) **A table showing the percentage of investment in each investment field, with its minimum and maximum:**

Asset Categories	Minimum	Maximum
Shares of petrochemical sector companies that are compliant with Shariah regulations	95%	100%

- E) Stock markets where the Fund is likely to buy and sell its investments:** All of the Fund's investments will be in the Saudi Capital Markets.
- F) Disclosure of whether the Fund Manager intends to invest in the units of the Investment Fund:** Yaqeen Capital Company, in its capacity as the Fund Manager, may subscribe in the Fund starting from its offering, and then its contribution can be gradually reduced to the level deemed appropriate.
- G) Transactions, methods and tools that the Fund Manager may use for the purpose of making investment decisions for the Investment Fund:**
- The Fund follows a passive management approach to investing in the components of the Yaqeen Saudi Petrochemical Index (YSPI) index. In any case, the rebalancing operations are carried out periodically (at least every quarter) in order to ensure that the performance of the index is consistent and sufficient cash is available in the Fund.
 - The Fund invests in the components of the Fund's portfolio, taking into account the relative weight of the asset allocation, while adequate cash is maintained in the Fund on an ongoing basis to meet expenses and any other obligations to the Fund.
 - The Fund does not seek to outperform the index, such as other funds. It does not seek temporary entry into defensive investments when the market is low or in the case of excessive assessment. The Fund seeks to simulate and match the benchmark performance.
 - The Fund Manager will, yearly at least, evaluate the index to ensure that the fund's long-term growth and capital gains objectives can be properly realized.

Investment Policies:

- The Fund seeks to simulate the performance of the index by maintaining the deviation ratio at the lowest level.
- The Fund Manager seeks to maintain a margin of deviation in comparison to the performance of the index by a maximum of 1%, taking into consideration factors of income, fees and expenses.
- The deviation ratio can be measured as a deviation coefficient for the increase or decrease in each day of the fund's return compared to the daily performance of the index.
- The Fund seeks to achieve a correlation coefficient of 0.99 on a yearly basis between the daily return level of the benchmark index and the Fund's daily return.
- The Fund deals with issuing and recovering units in kind only (a basket of shares in addition to a cash share). Details of the units' bundles, the components of the stock basket and the monetary component are posted by the Fund Manager on a daily basis.
- The Fund exercises its rights resulting from the actions of the companies related to its investments in order to best benefit the holders of the Fund's units. For example, in the exercise of rights of issue, the Fund participates in the exercise of the rights of issue to any of the shares invested in which the index in turn the process of rebalancing its portfolio accordingly with the concern to address any deviations that may occur. The cash required to exercise the rights of issuance (if necessary) may be provided by the relative sale of some components of the Fund's portfolio of shares (the relative sale means the relative weight of the portfolio compared to the index after the sale). The calculation of the rights to issue and the actions of other related companies is carried out in accordance with the normal course of business and generally accepted accounting principles.
- Distributions received by the Fund will be retained in the Fund initially for purposes of fees, expenses, etc. (refer to the Distribution Policy under these Terms and Conditions).
- In the event of any other actions of companies such as mergers, acquisitions or otherwise, the Fund Manager shall conduct the necessary actions to the best benefit of the unit holders. However, in the event of any discrepancy between the relative weights of the Fund relative to the relative weight of the Index as a result of any of the actions of the companies, the Fund Manager shall rebalance the portfolio accordingly.
- The Fund does not reconcile its portfolio with Shari'ah controls. In any case, the index that the Fund invests in its portfolio complies with Shari'ah controls. The Fund only invests in the index portfolio. The index purifies the shares of its portfolio for Shari'ah purposes on a quarterly basis and eliminates shares that violate Shari'ah controls. Accordingly, the Fund Manager rebalances his portfolio and the Fund Manager takes into account the interest of

the unit holders in the event of the disposal of shares that violate the Shari'ah controls. The Fund then buys more shares to achieve a relative match with the benchmark portfolio.

- If the index changes (the disposal or increase of shares), the Fund Manager shall endeavor to position the Fund again with the index portfolio level by rebalancing the Fund's portfolio.
 - The Fund may temporarily suspend the issuance and recovery of units during the rebalancing phase.
 - The Fund does not face the risk of tracking a short-term performance deviation as the shares that have been discontinued continue to form part of the index's portfolio until the time of update. The number of floating free shares and their closing prices are used before the listing is stopped to calculate the index.
 - If the listing continues to be suspended after the update date, both the Fund and the Index will dispose of the outstanding shares at the date of the update.
 - The fund follows the principle of a conservation when evaluating the Fund and adopts a method that reflects the fair value of the Fund's assets.
- H) Types of securities that cannot be included in the Fund's investments:** The Fund shall not invest in securities other than those mentioned earlier in these Terms and Conditions.
- D) Any other restriction on the type (s) of securities or other assets to which the Fund may invest:** The Fund shall abide by the investment restrictions mentioned in paragraph 41 of the Regulations of the Investment Funds issued by the Authority. The Fund will not invest in any securities that do not comply with the Shariah standards approved by the Fund's Shariah Supervisory Board.
- J) The extent to which the assets of the Fund may be invested in units of a Fund or Investment Funds managed by that manager or other managers:** Not applicable.
- K) The powers of the Fund in the assumption and the policy of the Fund Manager regarding the exercise of borrowing powers and its policy statement regarding the pledge of the Fund's assets:**
- The Fund is not authorized to grant loans to any other parties.
 - The fund is not authorized to carry out borrowing, and accordingly, the fund manager will not undertake any activity that can be interpreted as borrowing.
- L) Disclosure of the upper limit for dealing with any counterparty:** Not applicable.
- M) Fund Manager's Risk Management Policy:**
- Compliance with the Capital Market Law and its executive Regulations and the Investment Funds Regulations issued by the Capital Market Authority Board and other related laws and regulations in force in the Kingdom of Saudi Arabia.
 - Adhere to the investment limits as set out in the Terms and Conditions of the Fund.
 - Adhere to the investment decision-making mechanism of the Fund and to seek the maximum amount of information relevant to any investment that the Fund decides to enter into.
 - To follow up the Fund's activities and the Fund Manager's commitment to its investment limits and obligations to the Client by Compliance Department.
 - As for the unpredictable risks, Yaqeen will make all effort to try to study these risks before making the investment decision.
 - Stop listing the shares in which the Fund invests.
 - The Capital Market Authority may stop listing the shares in which the Fund invests. In such a case, the Fund shall act in the following cases:
 - It shall stop the issuance or recovery of unit bundles until the issue of listing of shares has been resolved.
 - It shall adopt an alternative assessment method (based on fair value) after the prior approval of the Capital Market Authority in respect of shares that have been discontinued.
 - The Fund does not face the risk of tracking a short-term performance deviation as the shares that have been discontinued continue to form part of the index's portfolio until the time of update. The number of floating free shares and their closing prices are used before the listing is stopped to calculate the index.
 - Addressing Performance Deviation Ratio: The Fund seeks to track the performance of the index to achieve its investment objectives in achieving growth and capital gains in the long term and there are no fundamental risks of undesirable deviation in performance. The Fund Manager has adequate tools (such as quantitative and other analysis models) to assist in finding solutions and

estimating deviations. The Fund Manager shall review any deviations that may occur and apply procedures that mitigate the impact of those risks.

- If the listing continues to be suspended after the update date, both the Fund and the Index will dispose of the outstanding shares at the date of the update.
- The Fund follows the principle of a conservation when evaluating the Fund and adopts a method that reflects the fair value of the Fund's assets.
- Liquidity risk: The Fund's units are listed in Tadawul to be available to investors for trading during the day trading hours. The Fund Manager has signed agreements with the Market Maker to provide liquidity in the market. The market maker prices the units in Tadawul so that the margin between the selling and buying price does not exceed 2%. The market maker faces pricing risks while issuing and recovering market units. To mitigate the impact of these risks, the Fund provides the market maker with the possibility of immediate issuance and recovery of the Fund's units enabling it to access the Issued Units and the components of the Market Basket through immediate issuance and recovery operations.

N) Benchmark "indicative index":

- The Fund's benchmark is Yaqeen Saudi Petrochemicals Index (YSPI).
- Index Provider: Saudi Stock Exchange (Tadawul).
- Methodology used to calculate the index: The Yaqeen Saudi Petrochemicals Index (YSPI) is evaluated on the basis of Free (floating) capital value of the market. It shall follow up the performance of all listed and influential petrochemical companies listed on the Saudi Stock Exchange (based on floating free capital value) compliant with Shariahh controls. The value of the index is calculated using the closing price.

N) Derivatives contracts: Subject to Shariah controls in all Fund operations, the Fund will not invest in financial derivatives.

O) Any exemptions approved by the Capital Market Authority regarding any restrictions or limits on investment: Not applicable.

4. Main risks of investing in the fund

Prospective investors should be aware of the risks that their investment in the Fund may be exposed to. Therefore, the Fund is suitable for investors who realize the magnitude of those risks and have the financial capacity, awareness and knowledge that qualifies them to bear a partial or total loss of the investment value. Given the nature of the investment in the Fund and its investment strategies, it turns out that investing in the Fund involves a high degree of risk, including but not limited to the risks referred to below.

The Fund Manager cannot give any assurances that the Unit Holders will achieve profits on their investment in the fund, but rather that the money invested in the Fund is subject to total or partial profit or loss. Also, the statements on the risks below do not represent a complete explanation of all the risks involved in investing in the Fund. In addition, as the Fund's investment portfolio evolves and changes over time, the investment in the units may be subject to other risk factors. Accordingly, each prospective investor should study the Terms and Conditions in full and consult his professional advisors before deciding to apply for subscription in the units.

- A) The Fund is considered a high-risk investment in view of its investment in the shares of companies listed on the Saudi stock market.**
- B) The previous performance of the Investment Fund, or the previous performance of the index does not indicate what the fund's performance will be like in the future.**
- C) The Fund does not guarantee to Unit Holders that the fund's performance (or its performance compared to the index) will be repeated or similar to past performance in the future.**
- D) Investment in the Fund is not a deposit with any local bank that markets or sells securities or follows the Investment Fund.**
- E) Investors in the Fund may be exposed to the risks of partial or total financial losses resulting from their investments in the Fund units.**
- F) The elements of risks that may affect the value of the investment in the Fund are as follows, for example, but not limited to:**

1. **Investment risks:** The Fund may be exposed to investment risks that could result in loss of invested amounts. The Fund Manager does not make any undertaking or commitment that the objectives of the Fund will be realized.
2. **Shares Investment Risks:** Investment in the Fund may be exposed to the risks associated with investing in ordinary equity funds, which may include the risk of market volatility and potential fluctuations in equity prices due to supply and demand factors, inflation risks, liquidity risk and other regular and irregular risks. Equity prices can be reduced as a result of economic factors or as a result of expectations or factors relating to the companies in which the Fund invests. For example, non-positive reports on returns may lead to a market decline and public stock prices for some issuers may have a faster response to market movements. The decline in the market affects the value of the shares in which the Fund invests. The value of the Fund's portfolio may decline as a result of the issuer's inability to meet expected distributions as a result of the Company's financial position.
3. **Passive management risk (index risk):** The Fund follows an inactive management approach to monitor the performance of the index that differs from an active management method that exceeds the performance of the index by direct and active criticism of the target shares. This may entail the possibility that the Fund will retain components of the index's shares, regardless of developments at the macro level or in the performance of a particular stock or industry. Retain the shares of certain companies without responding to changes in market factors or in the performance of certain stocks may adversely affect the performance of the Fund.
4. **Risks of low correlation coefficient:** Fund returns may not match the index's returns due to the Fund's exposure to a number of operating expenses that are not applicable in the case of the index. The Fund may incur certain operating expenses in the case of the sale and purchase transactions when the rebalancing process is carried out to reflect changes in the index portfolio. The Fund's investments may not be fully in shares due to cash flows or cash reserves held by the Fund to meet any expenses or obligations.
5. **Concentration risk (segment investment risk):** If the index concentrated on a specific industry or group of industries, the Fund's investments will be focused on that sector where the Fund follows the distribution and weight of the index portfolio. In this case, the values of the Fund's units may rise or fall in the market more or less than the prices of units of funds investing in shares of companies in various sectors in the market.
6. **Risks of lack of Diversification:** Opportunities for diversification of the Fund's portfolio are limited within the components of the indicative index "Benchmark" portfolio and within the target sector. The Fund may invest a significant share of its assets in the shares of a limited number of issuers as part of its investment strategy and policy compared to funds that have opportunities to diversify the investment through listed shares. Therefore, the Fund's performance may be affected by fluctuations in the performance of a relatively limited number of shares.
7. **Risks of Shariah Compliance:** In the event that any stock in the index is not compatible, it shall be disposed of and therefore the investment opportunities of the Fund are in a tight space compared to the investment world available to conventional funds, which may reduce opportunities for the Fund's investments.

5. Risk Assessment Mechanism

The Fund Manager acknowledges that there is an internal mechanism to assess the risks related to the fund's assets. However, no risk control system is without potential errors or failures. No assurance can be given that any risk control framework used by the Fund Manager will achieve its objective. The target risk limits set by the Fund Manager may be based on past patterns of returns and correlations of the securities in which the Fund invests. No confirmation can give past patterns an accurate prediction about future patterns.

6. Target group to invest in the fund

The Fund mainly targets investors from individuals, institutions, government agencies and others who have a desire to invest in the Saudi stock market.

7. Investment Restrictions / Limits

The Fund Manager shall abide by the restrictions that apply to the Fund contained in the Funds Regulations, the Fund's Terms and Conditions, the Fund's Shariah Board controls.

8. Fund's currency

The fund's currency is the Saudi Riyal.

10. Assessment and Pricing

A) How to assess all Fund assets

1. Securities listed or traded in the financial market: it is evaluated at the last transaction price in that market. If such securities are suspended, they will be settled at the latest rate prior to the suspension, unless there is a conclusive evidence that the value of such securities has fallen below the suspension price.
2. Any other investment: The fair value determined by the Fund Manager based on the methods and rules approved by the custodian and after verification by the Fund's auditor.

B) Number and Frequency of Assessment Points: There will be a regular indicative assessment for the net asset value of the Fund by issuing an indicative assessment every 15 seconds during trading hours, as well as a net asset assessment at the end of the day.

C) Actions to be taken in case of error in assessment or error in pricing:

1. If a Fund asset is incorrectly assessed or the unit price is incorrectly calculated, the Fund Manager shall document the error directly and promptly report the error in the assessment or pricing which constitutes 0.5% or more of the unit price to the Authority. This is immediately disclosed on the Fund Manager's website, on the Market's website and in the Fund's reports.
2. The Fund Manager will reimburse all affected Unit Holders (including former unit holders) for all errors in the assessment or pricing without delay.

D) Method of calculating unit price for the purposes of execution of applications for subscription and recovery:

- Net Asset Value represents the net value of the Fund at the end of each working day. The net asset value is calculated by calculating the value of all the assets of the Fund at the closing price, in addition to any existing monetary items minus any accrued expenses at the end of the working day. The net asset value of the unit is calculated by dividing the result by the number of units existing at the assessment time.
- The indicative price is an indication of the net asset value of the Fund during the trading hours where the last trading price is used while the indicative price is calculated. The same remaining steps are taken to calculate the net asset value as the expenses due are netted depending on the net value of the assets by the end of the last trading day to reach the net indicative value of the unit.

In both cases, the net asset value of the unit of the Fund as well as the reference price for unit trading can be reached by dividing the net asset value by the number of units existing at the time of calculation.

- The purpose of issuing the unit price is to clarify the relative relationship between the net asset value of the Fund unit and the market value of the unit's trading. Under normal circumstances, the Fund Manager follows the above-mentioned assessment policy. In any case in other circumstances beyond his will, the Fund Manager shall endeavor to follow the best assessment methods to assess Fund assets. For example, the process of stopping the listing of shares by the Authority or Tadawul. In some cases, the fair value may be used instead of market value after reporting to the CMA and obtaining its approval. Posting shall be made on both Tadawul and Yaqeen website and in any other appropriate means of posting.
- The fund's net asset value is calculated by the administrator in accordance with accepted and recognized accounting standards.

Expenses that can be deducted from the total asset value:

- Portfolio management fees and any other third party fees (if any).
 - Administrative and external auditor fees.
 - Custody fees.
 - Index service provider fees.
- E) **Place and time of publication of the unit price, and its frequency:** The net asset value assessment process is carried out at the end of the day and the price is calculated and published within two hours of market closing time.

The Net Asset Value and Indicative Price are expressed in Saudi Riyal and are available to investors through the Fund Manager's offices or by E-Posting on the Fund Manager's website and Tadawul www.Yaqeen.sa. www.tadawul.com.sa.

11. Transactions

- A) Details of the initial offering:
