

Alpha Murabaha Fund

2026, 1st Quarter Report

Fund Objective

To provide low risk return to the unit holders while maintaining capital and providing liquidity. This is mainly done through investing in Murabaha transactions and other financial instruments that are low risk, short-term maturities and are compliant with the Shariah principles. The Fund does not distribute profit to the unit holders. All profits and earned revenues are reinvested in the Fund.

Description of formulas used for assessing performance and risk measures

01 Standard Deviation

This metric is calculated as the deviation in portfolio returns between two periods and is annualized to reflect either monthly or yearly timeframes.

03 Tracking Error

This metric is calculated as the standard deviation of the difference between the portfolio and the benchmark returns and is annualized to reflect either monthly or yearly timeframes.

05 Alpha

This metric is calculated as the measure of portfolio's excess return relative to its benchmark.

02 Sharpe indicator

This metric is calculated by subtracting the portfolio return from risk-free return and dividing the result by standard deviation of portfolio.

04 Beta

This metric is calculated by determining the slope of the linear regression line of the asset's returns (as the dependent variable) against market returns (as the independent variable) over a specified date range.

06 Information index

This metric is calculated by subtracting the benchmark return from the portfolio return and dividing the result by tracking error.
