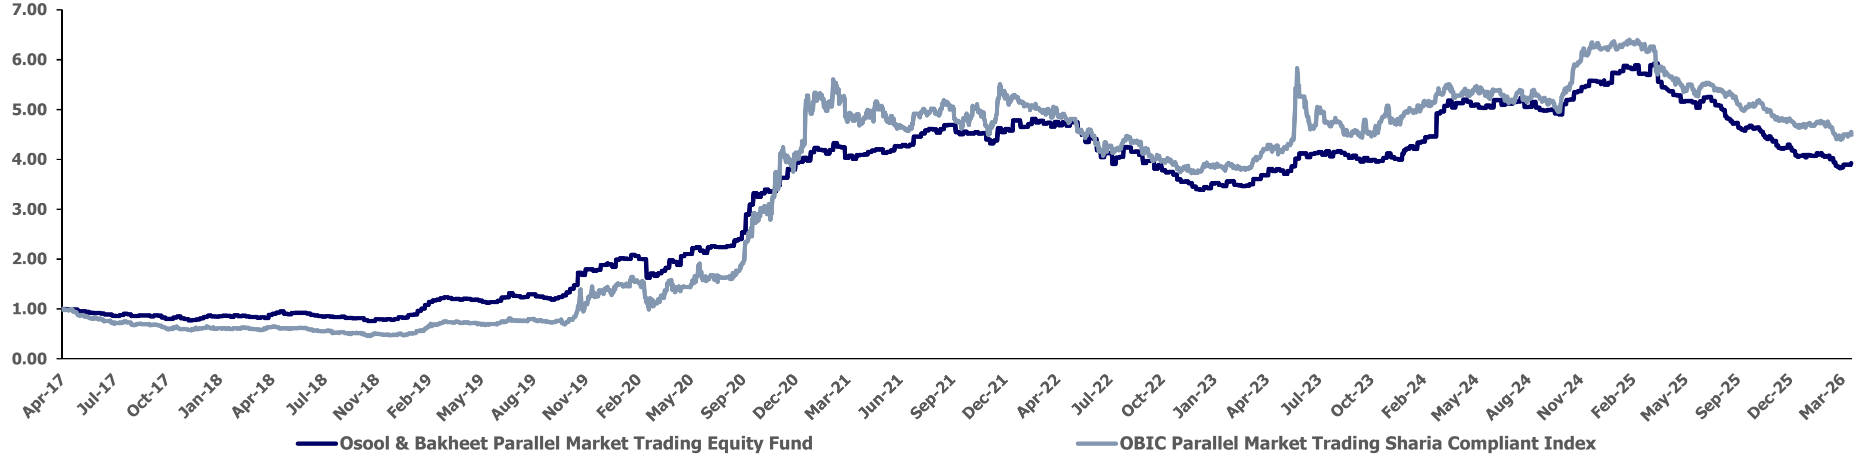
Fund Performance



Fund Manager Comment

The Saudi Parallel Market (Nomu) continued its price correction during the first quarter of 2026, with the Fund's benchmark index declining by 2.2% compared to the previous quarter's close, driven by profit-taking on stocks that had experienced significant gains in prior years, coupled with reduced risk appetite among investors amid geopolitical tensions and energy market disruptions. Nevertheless, the market maintained acceptable liquidity levels, supported by IPO activity and selective demand for stocks with sound fundamentals. Looking ahead, market performance is expected to lean towards cautious optimism, albeit remaining tied to investor selectivity and divergent financial performance among listed companies. That said, the expansion in new listings and the approval of the Special Purpose Acquisition Companies (SPACs) framework may provide positive catalysts for a gradual recovery in market momentum.

Statement of the formulas used to calculate performance and risk metrics:

Fund Statistics	
Sharpe Ratio	**Standard Deviation**
Formula:Sharpe = $(R_p - Rf) / \sigma_p$	Formula: $\sigma = \sqrt{(\Sigma (R_i - \bar{R})^2 / (N - 1))}$
R_p→ Portfolio return	σ → Standard deviaΘon
Rf→Risk-free rate	R_i → Return in each period
σ_p→ Standard deviaΘon of pornolio returns	$\bar{R}$ → Average return
	N → Number of periods
Tracking Error	**Beta**
Formula: TE = $\sqrt{(\Sigma (R_p - R_m)^2 / (N - 1))}$	Formula: $\beta = Cov(R_p, R_m) / Var(R_m)$
TE → Tracking Error	β→ Sensitivity of the fund to market movements
R_p → Portfolio return	R_p → Portfolio return
R_m → Market return	R_m → Market return
N → Number of periods	Cov → Covariance between Portfolio and market returns
	Var → Variance of market returns
Alpha	**Information Ratio**
Formula: Alpha = $\Delta R_p - \Delta R_m$	Formula: IR = $(R_p - R_m) / TE$
Alpha → Excess performance of the fund over the benchmark	IR → Information Ratio
ΔR_p → Change in Portfolio return	R_p → Portfolio return
ΔR_m → Change in market return	R_m → Market return
	TE → Tracking Error
