Introduction

We have reviewed the accompanying interim statement of financial position of Osool and Bakheet fund for trading in IPO in compliance with shariah regulations (the "Fund"), which is managed by Osool & Bakheet Investment Company (the "Fund Manager") as at June 30, 2023, and the interim statements of profit or loss and other comprehensive income, interim statement of changes in net assets attributable to unitholders and interim statement of cash flows for the six - month period then ended and the accompanying notes which are an integral part of these interim financial statements. The Fund Management is responsible for the preparation and presentation of these interim financial statements in accordance with International Accounting Standard 34 - "Interim Financial Reporting" as endorsed in the Kingdom of Saudi Arabia. Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of interim financial information performed by the independent auditor of the entity", as endorsed in the Kingdom of Saudi Arabia. A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing, as endorsed in the Kingdom of Saudi Arabia, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements are not prepared, in all material respects, in accordance with IAS 34 - "Interim Financial Reporting" as endorsed in the Kingdom of Saudi Arabia.

8 -Measuring the fair value of financial instruments

The Fund's financial assets consist of cash and cash equivalents, accrued dividends, investments at fair value through profit and loss and other financial assets. While financial liabilities consist of due to related parties, accrued expenses and other liabilities. All financial assets and financial liabilities are classified at amortized cost except for investments at FVTPL which are designated and measured at fair value.

Fair value

Fair values are classified into different levels in the fair value hierarchy based on the inputs used in the valuation methods as follows:

Level 1: The quoted market prices in active markets for identical assets and liabilities.

Level 2: Valuation techniques that depend on inputs that affect the fair value and can be directly or indirectly observable in the market.

Level 3: Valuation techniques that depend on inputs that affect the fair value that cannot be directly or indirectly observed in the market.

9 -Financial instruments and risk management

Financial risk factors

The objective of the Funds is to maintain the Fund's ability to continue as a going concern so that it can continue to provide optimum returns to unitholders and to ensure reasonable safety for unitholders. The Fund's activities are exposed to a variety of financial risks: market risk, credit risk, liquidity risk, operational risk, and fair value assessment.

The fund manager is responsible for identifying and controlling risks. The fund's board of directors supervises the fund manager and is ultimately responsible for the general management of the fund.

Monitoring and control risks are primarily identified to be implemented based on the limits set by the fund's board of directors. The fund has its own terms and conditions document which defines its general business strategies, risk appetite and general risk management philosophy and is bound to take actions to re-rotate the portfolio in line with the investment guidelines.

The Fund uses different methods to measure and manage the different types of risks to which it is exposed. These methods are explained below.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk includes three types of risks: foreign exchange risk, currency rate risk and other price risks.

9 - Financial instruments and risk management (continued)

Financial risk factors (continued)

Market risk (continued)

Foreign exchange rate risk

Foreign exchange risk is the risk that the value of future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. These risks arise from financial instruments denominated in foreign currencies.

Commission rate risk

The risk arising from the fluctuation of the value of financial instruments as a result of fluctuations in commission rates prevailing in the market. The fund has no significant assets or liabilities related to commission rates as of June 30, 2023.

Price risk

Price risk is the risk that the value of the Fund's financial instruments will fluctuate as a result of changes in market prices due to factors other than the movement of foreign exchange rates and currencies.

Price risk arises mainly from uncertainty about the prices of future financial instruments owned by the Fund. The fund manager carefully monitors the movement of the prices of its financial instruments listed in the Saudi financial markets, and the fund manager manages risks by distributing its investment portfolio by investing in various sectors.

Credit risk

It is the inability of one party to fulfill its obligations, which leads to the other party incurring a financial loss. The Fund does not currently have any significant credit risk. Whereas, the fund's financial assets, which consist of cash and cash equivalents, and those financial assets at fair value through profit or loss, are all held with banks and financial institutions with good credit ratings.

The fund seeks to reduce credit risk by monitoring exposure to credit risk, limiting transactions with low creditworthy parties and continuously assessing the credit capacity of contracted counterparties.

	June 30, 2023 (unaudited)	December 31, 2022 (audited)
Investments at fair value through profit or loss	2,368,136	2,082,695
Dividends receivable	1,618	471
Cash and cash equivalent	563,583	48,164

Liquidity risk

It is the risk of the Fund's inability to secure the necessary liquidity to meet the obligations related to financial instruments. Liquidity risk may result from the inability to sell a financial asset quickly at an amount close to its fair value. Liquidity risk is managed through regular monitoring to ensure that sufficient liquidity is available to meet any future commitments.

	Book value	Less than a year
As at June 30, 2023 (unaudited)	312,711	312,711
Accrued expenses and other liabilities		
As at December 31, 2022 (audited)	140,888	140,888

Operational risk

Operational risk is the risk of direct and indirect loss resulting from a variety of causes related to the processes, technology and infrastructure that support the Fund's activities, whether internally or externally at the Fund's service provider and from external factors other than credit, liquidity, currency and market risks such as those arising from legal and regulatory requirements.

The Fund's objective is to manage operational risk in order to balance limiting financial losses and damage to its reputation with achieving its investment objective of generating returns for unitholders.
