- The value of the fund's assets that are invested in money market instruments is determined on the basis of the nominal value in addition to the accumulated profits until the trading day, as for the structure products the return will be calculated for the period that past during the life of the transaction and added to the nominal value of the transaction.
- Unlisted bonds and sukuks are valued using their carrying amount plus accumulated profits.
- As for the purposes of evaluating the bonds and sukuk listed or traded in any organized financial market or on an automated pricing system, the price of the last transaction made in that market or system will be used.
