Therefore, Unitholders might lose some or all of their investments. Investing in money market Funds is different from depositing money with a local bank.
- e. The value of the Units and their returns are subject to fluctuations. Investors may not be able to recover some or all of their investments; people are advised to invest in the Fund only if they are able to afford the loss, which can sometimes be substantial.
- f. The following is a list of the main potential risks associated with investing in the Fund, the risks exposed to the Fund and any circumstances likely to affect the Net Asset Value and returns of the Fund, noting that the mentioned risks below might not represent all risk factors related to investing in the Fund:
 - 1. **Risks Associated with Credit and Counterparty:** Risks involving change in the financial position of the contracting parties as a result of changes in management, solvency, demand or products and services, which may result in failure of these parties to fulfil agreed obligations or deliver contracts, and which will consequently cause a decline in the Unit prices.
 - 2. **Interest Rate Risk:** The value of Investments in the Fund may be affected by interest rate changes (including interest rates). Investment returns and investment instruments priced at the market value may be adversely affected, leading to a decline in the Unit price.

3. **Rating Downgrade Risk:** Any change relating to credit rating downgrade, by a rating agency, of a security/ issuer of fixed income instrument or counterparty may adversely affect the value of the Investments, hence, leading to a decline in the Fund's Net Asset Value and Unit price as a result of the impairment of the Fund's investment vehicles whose credit rating has been lowered.
4. **Risk of Internal Rating of Fixed Income Instruments:** Unitholders will assume the risks resulting from investment in non-rated instruments, in which the Fund may invest based on in-house assessment and analysis by the Fund Managers. Any deterioration in the financial position of the issuers of Fixed Income Instruments may result in devaluation of the Fund's Net Asset Value, which would adversely affect the Fund's Unit price.
5. **Liquidity Risk:** Liquidity of Investments may be low in some periods and as a result this may increase the difficulty of liquidating some of the Investments. Reduced market liquidity may adversely affect the market price of the Fund's Investments and the Fund's ability to sell particular Investments to meet its liquidity requirements. This risk is mitigated by utilizing the cash available in the Fund. If total redemptions exceed 10% or more of the Fund's NAV, the Fund Manager has the right to postpone such redemptions to the next Dealing Day on a pro-rata basis. The Fund may suffer loss due to heavy redemptions. The Fund may suffer loss due to heavy redemptions. As a result, the Fund Manager may face difficulty in liquidating securities issued in small volume, and securities issued in way of private placement traded over the counter (OTC).
6. **Currency Risk:** A difference in the exchange rate can lead to losses when investing in a currency other than that of the Fund, since exchange may fluctuate at times of redemption and subscription to the Fund.
7. **Economic, Regulatory and Political Risks:** This is the risk of changes in the economic conditions such as recession, inflation, or oil prices, which may negatively affect the value of shares invested in, thus adversely impacting the Fund's performance and Unit value. In addition, the changes in the regulatory environment, legislation, accounting standards, local and governmental regulations may adversely affect the Fund's performance and Unit value.
8. **Concentration risk:** The Fund will mainly invest in contracts and securities issued by financial institutions, so the performance of the Fund and the Unit price may be adversely affected by the performance of the sector in general.
9. **Risks Associated with Complying with Shariah:** The Fund Shariah Committee decides whether the Fund and its Investments comply with the Shariah. However, there is a possibility that some Investments may not satisfy the Shariah requirements, which could lead the Fund to avoid such Investments or failure to reap the target return of these Investments, which may result in a decrease in the Unit price.
10. **Risks of Dependence on the Fund Manager's Personnel:** The Fund's performance depends largely on the capabilities and skills of the Fund Manager's employees, which may significantly affect the Fund's performance in the event of resignation or absence of any one of them and failure to secure a suitable replacement.
11. **Return risk:** The market value of the Fund's major Investments may decrease due to its exposure to many risks. Consequently, Unitholders may not achieve a positive return on their invested amounts due to the fluctuation of the value of the Fund's major Investments, which in turn reduces the net asset value of the Fund and the Unit price. The Investor may not be able to redeem the full amount invested.
12. **Risk of Call Options and Reinvestment:** Some Fixed Income Instruments may carry a call option that gives issuers the right to call Fixed Income Instruments before maturity. This would result in the failure to achieve the Fund's target returns and profits from such instruments and may adversely affect the Fund's performance and Unit price.
13. **Conflict of Interest Risk:** This risk arises in situations that affect the objectivity and independence of the Fund Manager's investment decisions due to a personal interest. This may adversely affect the Fund's performance.
14. **Risk of Natural Disasters:** These include volcanoes, earthquakes, hurricanes, floods, which are beyond control, and cause considerable damage to property and assets. Natural disasters may adversely affect the performance of all sectors, including economic and investment sectors and adversely affect the Fund's performance and the Unit price.

- 15. Risks of Investment in Other Funds:** The other Investment Funds in which the Fund invests may be exposed to risks similar to those set out in this Paragraph, which may adversely affect the Fund's performance and the Unit price.
- 16. Zakat and Tax Risks:** Investing in the Fund may result in tax obligations including zakat. These taxes may apply to the Fund and its investments or to the Unitholder. The Authority of Zakat, Tax and Customs of the Kingdom of Saudi Arabia or any other authority may impose taxes on investment funds leading to reduction of the Fund's NAV and Unit price.
